EDUCATION

Indira Gandhi Delhi Technical University for Women | *B.Tech CSE* | CGPA: **9.11** 2025 – 2028
Delhi Skill and Entrepreneurship University | *Diploma, Computer Engineering* | CGPA: **9.32** 2022 – 2025

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript
Web Technologies: HTML, CSS, React.js, Node.js, Express.js
Databases & Tools: MySQL, MongoDB, Firebase, Git, GitHub, VS Code
Embedded Systems: Embedded C
Concepts: OOP, Data Structures & Algorithms, Structured Programming

PROJECTS

Vision-Based Morse Code Decoder  | *Python, OpenCV, MediaPipe, NumPy, PyAutoGUI*

- Developed a real-time, hands-free text input system decoding eye blinks into Morse code using **facial landmark tracking** and **timing-based classification**.
- Implemented **Eye Aspect Ratio (EAR)** detection via **12 eye landmarks** using MediaPipe and NumPy, classifying blinks as dot (**<0.25s**) or dash (**0.25–0.65s**) with gap thresholds.
- Built a complete decoding pipeline supporting all **26 letters (A–Z)** with live output, **gesture-based ON/OFF toggle**, and real-time visual feedback.

E-VALIDATE  | *Python, Flask, MySQL, HTML, CSS*

- Developed a **rule-based classification system** to automatically validate legal metrology declarations on pre-packaged goods against **18 structured data fields**.
- Processed and validated **10+ product listings** using structured data parsing and pattern-matching logic, flagging missing and incorrect declarations.
- Generated automated compliance reports reducing manual validation time by up to **90%**, demonstrating practical **data-driven decision making**.

ESP32 Smart Archery Game  | *ESP32, Embedded C++, JavaScript, HTML5 Canvas, Firebase, WebSockets*

- Developed a real-time IoT archery scoring system on ESP32, serving a browser-based game wirelessly with automated hit detection across **2 difficulty levels** and **5 scored rounds**.
- Implemented **WebSocket-based** communication and Firebase Realtime Database to synchronize hit events, live scores, and leaderboard updates across connected clients.
- Designed an interactive **HTML5 Canvas** interface featuring animated targets, dynamic difficulty progression.
- Hosted the web application directly on the ESP32 using **FFat and ESPAsyncWebServer**, integrating IR sensors and an OLED display for real-time hit detection and score feedback.

ACHIEVEMENTS

Qualified among the **Top 15,000 participants** in **The Big Code 2026** by Google.
Selected among **Top 100 teams** in the **Smart India Hackathon (SIH) 2025** university-level internal screening.
Competitive Programming: **LeetCode** (Contest Rating: **1480**) | **CodeChef** (Highest DSA Rating: **1019**).

INTERNSHIP

IGDTUW Anveshan Foundation  Jun 2026 – Jul 2026
MERN Stack Intern Remote

- Developed **MERN stack applications** using **React.js, Node.js, Express.js, MongoDB, TypeScript**, and **MVC architecture** through hands-on assignments.
- Integrated **Generative AI** capabilities using **OpenAI APIs** and **Hugging Face** models into full-stack web applications.

ANVESHAN Foundation, IGDTUW  Sep 2025 – Oct 2025
AI/ML Intern Remote

- Completed structured training in **Python, EDA, data preprocessing** and **supervised/unsupervised ML**, covering **8+ algorithms** including Linear Regression, SVM, KNN, Decision Tree, Random Forest, and K-Means.
- Performed **Exploratory Data Analysis** on real-world datasets using **Pandas, Matplotlib, and Seaborn** — including descriptive statistics, outlier detection, correlation analysis, and missing value handling.

STEM VIVIFIERS (OPC) PVT. LTD.  Aug 2024 – Dec 2024
Intern Remote

- Conducted **data-driven research** on candidate career patterns to support analytical decision making using structured data and **database design** for internal tools.
